### Description

The goal of this assignment is to prepare everyone for the “Concept Check” portion of the next mid-term exam. For each assigned section, your group must create (each in a separate document):

- 1) A typed glossary of the terms defined in the section (anything in bold, or in a definition box).
- 2) A typed reference including any theorems, lemmas, rules, notation, important equations, or other important, non-definition, facts introduced in the section.
- 3) A concept map, illustrating how the concepts in the section are connected to one another and to major concepts from other sections.

On the due date, your group is to bring three hard copies to class, and e-mail me electronic copies, before the start of class.
