

HW 2/27:

I used the new rubric + either made a new letter or combined things I didn't feel fit into one of the existing categories:

A: Problem statement missing (-0.3)

C: missing explanation/^{work} (-0.3)

note: in the future I think I will have more of a gradient for this, skipping a step vs. no work at all

K: did not state projection formulas in 13.3 (36, 38) (-0.2)

N: 13.3 #24, one of a, b, or c incorrect (-1)

O: missing part of an answer, e.g. 13.4 #8 missing switch, 13.7 #13 missing explanations or did not tell whether a vector or scalar, 13.4 #14 missing direction (-1)

P: 13.2 #41, described answer but did not give equation for the sphere (0.75)

Q: incorrect answer for things listed in (D) (-0.5)

Z: 13.5 #1, (-0.3) for each incorrect answer
