

Calculus 2
Group Project 1
“Nearly Final” Drafts Due 2/10
Final Draft and Presentations Due 2/13

For each of the problems that your group is assigned, your group is to prepare a detailed, typed solution. You should include plenty of detail, and include any important formulas you use. The goal is to make your solutions complete enough that they may be read and understood by a Calculus 2 student, in another class, without them having to use any outside references to understand your solution.

You are, also, to be prepare to present your solutions to the class. For the “Concept Check” problems, this should include at least one detailed, original, example. Presentations should not exceed 20 minutes. Be sure to practice ahead of time to see how long your presentation takes. If you’d like, you may do this in office hours and I will give you feedback.

Please, contact me with any questions or concerns as they arise.
